

IBM AN17G - AIX WORKLOAD PARTITIONS: CONFIGURATION AND MANAGEMENT

Dauer: 4 Tage

Nr.: 35717

Preis: 2.890,00 € (netto) / 3.439,10 € inkl. 19% MwSt.

Durchführungsart: Präsenztraining

Schulungsmethode: Presentation, discussion, hands-on exercises, demonstrations on the system

Zielgruppe: The audience for this advanced training includes AIX system administrators, technical support individuals, system architects and engineers, and anyone who needs an operational understanding of the workload partitions feature of AIX.

Voraussetzungen: You should have: a good basis in AIX system administration skills.

These skills may be obtained by attending the course: Power Systems for AIX 2: AIX Implementation and Administration (AN12D1DE)

You will learn how to configure and manage Workload Partitions (WPAR) in the AIX environment. Hands-on exercises will reinforce the lecture and give students practice creating and managing both application and system WPARs using the command line interface. You will explore various configuration options such as implementing private and shared file systems, exporting devices, setting resource controls, and configuring network options. You will practice operations such as starting and stopping WPARs, performing dynamic configuration changes, and tracking data in log files. The course also covers the installation, configuration and management of versioned WPARs using the AIX 5.2 Workload Partitions for AIX 7 licensed program product.

Programm

WPAR Introduction

Creating WPARs

File Systems

Rootvg WPARs and VWPARGs

Networking

Resource Control

WPAR System Management

AIX 5.2 versioned WPAR overview

AIX 5.2 versioned WPAR installation and management

Hinweis

Class language is German, student notebooks in English.
